Agenda Item No.

City Manager Approval

**To:** Mayor and City Council Members  
**From:** Bernie Schroeder, Director of Public Works  
Megan Siren, Administrative Analyst  
**Date:** April 23, 2012  
**Subject:** Sewer Collection System – Utility Crane Truck Purchase

### **The Issue**

Shall the Council approve the purchase of a crane truck for the Public Works - Sewer Collections Division?

### **Conclusion and Recommendation**

Staff recommends that the City Council, by RESOLUTION, authorize the Public Works Director to purchase a crane truck for the Sewer Collections Division.

### **Background**

The crane truck will be utilized by the Sewer Collections Division of Public Works for collection system maintenance, primarily the City's lift stations. Due to the recently upgraded lift stations, the current crane truck is not able to safely lift the heavier pumps out of the lift station for maintenance. The City Mechanics and Sewer Collection Staff have determined that we should purchase a new crane truck that will accommodate the heavier pumps at the City's lift stations.

Staff requested proposals from vendors and is recommending the following vendors to complete the crane truck. The vehicle will be purchased from Mission Valley Ford from San Jose, CA; the crane will be installed and purchased from American Truck & Trailer Body Co. from Woodland, CA; the welder, generator, air compressor will be installed and purchased from Harris Industrial Gases from Auburn, CA. Once purchased, staff anticipates the build up to take approximately 4 months.

The purchase of the crane truck is not dependent on the City's decision to pursue the Regional Sewer Project as the crane truck will be utilized for sewer collection system maintenance.

In 2008, the City approved the Sewer System Management Plan (SSMP) that fulfilled the City's requirement for the Waste Discharge Permit for Sanitary Sewer Systems from the State of California. The Sewer Collection Division utilizes the SSMP to effectively manage the sewer collection system. The crane truck will assist staff in maintenance of the sewer collection system.

### **Alternatives Available to Council; Implications of Alternatives**

1. Proceed with Staff Recommendation
2. Do not proceed with staff recommendation.

---

**Fiscal Impact**

The crane truck and all the components will total not to exceed \$125,000 and will be paid by the Sewer Budget (#11). The capital project was proposed to be incorporated into fiscal year 12/13 budget; staff is requesting that a budget amendment be approved to authorize the purchase of the vehicle in fiscal year 11/12.
